| Product type: | Binary |  |  |

4-gang DRA switching actuator with integrated bus coupler. For switching four independently controllable groups of loads. Installation on DIN cap rail. With manual switch for switching over the relay (On/ Off) parallel or without KNX/EIB operation. No additional power supply. The ETS3.0d is recommended for configuring and commissioning the device. Multi-phase connection.

## Functions:

- Independent switching of the 4 outputs.
- Manual actuation of the relay independent of the bus/switching position display.
- NO contact or NC contact operation.
- Central switching function.
- Group feedback for reduction of bus load.
- Active or passive (object can be read out) cyclical feedback function.
- Feedback can be delayed until after the return of bus voltage.
- Logical linking function for each channel.
- Block function can be parameterised for each channel. As an alternative, forced setting function for each output.
- Time functions (switch-on, switch-off delay, staircase light function - also with advance warning function).
- Inclusion in light scenes possible, maximum of 8 internal scenes can be parameterised per channel.
- Memory function for light scenes.
- Elapsed-hours meter as forward/backward counter with limit function (limit can be changed via bus) can be activated for each output.
- Input monitoring for cyclical updating with safety setting.
- Reactions in case of bus voltage failure and restoration can be set for each channel following an ETS programming process.

Switching contact:
Relay with $4 \times$ zero-voltage closing contacts
Loading capacity
AC 230 V :
Loading capacity
AC 400 V :
DC switching capacity:
Max. switch-on current: $400 \mathrm{~A}, 150 \mu \mathrm{~s}$
Connected load:

10 A/AC 1 or 6 A/AC 3

200 A, $600 \mu \mathrm{~s}$
16 A / AC 1 or 10 A / AC 3

3600 W ohmic load
16 A, max. $140 \mu$ F capacitive load AC 230 V
